Professional Experience

Systems Engineering Intern — Visa

May 2026 – July 2026

- Engineered a multi-agent automation system for the AHA (Alert Handling Agreement) Review process, automating repetitive infrastructure alert analysis and accelerating validation workflows.
- Built an end-to-end analysis agent that correlated incident histories, short and detailed descriptions, and Opera portal alert configurations to classify alerts as valid, requiring human intervention, or requiring manual validation.
- Developed and integrated **10 custom MCP tools** within an MCP server to retrieve, process, analyze, and summarize infrastructure review data across multiple enterprise systems.
- Implemented **parallelized batch processing** to review AHAs in batches of 25, improving processing throughput while maintaining consistent analysis across large datasets.
- Designed a conversational interface for live progress tracking, real-time statistics, completion visualization, and Excel report generation containing AHA, incident, Opera alert, and review data.
- Delivered the solution across **Web UI, CLI, and Claude Code**, providing consistent functionality across multiple engineering workflows.

Front-End Developer Intern — CultureVo (NoviFE Platform, Next.js)

May 2025 – October 2025

- Architected and deployed the production frontend for **NoviFE**, an AI platform with 50+ global AI personalities, using Next.js 15, React 19, Tailwind CSS, and reusable component architecture.
- Integrated **FastAPI and Supabase** for authentication, AI memory synchronization, and data access, reducing data fetch latency by 40%.
- Engineered **VoiceCallUltra**, a real-time communication system using WebSocket streaming, asynchronous event handling, and multi-format audio fallback, achieving 50–85% faster response times.
- Built reusable components for chat, diary, and memory systems, reducing code duplication by 35% and improving maintainability across desktop and mobile platforms.

Achievements

- MSC Zerozam (2025)**: Secured 1st place for creating a full-stack healthcare application with secure data workflows.
- Secure X Hackathon (2024)**: Launched a winning Chrome extension with site-blocking and credential-protected rate-limiting features used by 10+ testers.
- Geo Genius Olympiad (2018)**: Silver medalist with 95% accuracy among 10,000+ participants nationwide.

Projects & Contributions

BuddyOnTrain (Full Stack Travel Platform)

Repository

- Engineered a full-stack platform using **React.js, Node.js, Express.js, MongoDB, and Socket.IO** to connect train travelers with companions on shared journeys.
- Developed **REST APIs** and integrated the **Indian Railway API** for train search, buddy discovery, travel-status management, and friend-request workflows.
- Implemented **JWT authentication, bcrypt password hashing, protected routes, and WebSocket-based real-time chat** with persistent message history and user presence.

Calmify (Full-Stack Website)

Repository

- Engineered a full-stack web platform using **React, Node.js, Express.js, MongoDB, Azure OpenAI, and Socket.IO**, integrating REST APIs with real-time communication workflows.
- Designed and implemented **JWT-based authentication, role-based access control, and real-time messaging**, supporting 500+ messages/day while maintaining 99% uptime.
- Built responsive interfaces using Tailwind CSS for optimized mobile and desktop experiences.

RunDown (AI Task Manager)

Repository

- Developed an AI-based task manager automating email and calendar extraction using **Python Flask and Gemini API**.
- Trained a classification model with 90% accuracy on 1000+ emails per user for real-time task prioritization.
- Implemented **OAuth 2.0 authentication** and automated daily synchronization for secure data refresh.

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering

SRM University AP, India

Aug 2023 – Aug 2027

Current CGPA: 8.83 / 10

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, SQL, C, Java, Go

Backend: Node.js, Express.js, FastAPI, Redis, MongoDB, MySQL, REST APIs, WebSockets, MCP Server, MCP Tools

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, Bootstrap

AI/ML: AI Agents, Agentic AI, MCP (Model Context Protocol), Prompt Engineering, Pandas, NumPy, RAG

Developer Tools: Git, GitHub, VS Code, Postman, Docker, AWS, Linux, Claude Code, Figma, Agile

Core Competencies: Data Structures and Algorithms, Backend Architecture, API Design, Authentication, System Integration, Parallel Processing, Distributed Processing, Scalability
